

INVESTMENT OPPORTUNITIES (CANADA)

Key sectors of the national economy are: technology, advanced production, natural resources, entertainment and media, agribusiness, cleantech and life sciences. The issue of privatization of health care in the health sector is being studied by the government. The sector of road infrastructure is carrying out some PPP works - "Public-Private Partnership". A total of 291 PPP projects are currently active in Canada with a total value of over 139.48 billions of CAD.

The sectors representing major investment opportunities are: information technology and communication (big data, Internet of Things, AI, cybersecurity, among others), biotechnology, health (growing importance of the ageing population), telecommunications, environment (renewable energy and environmental protection technologies), industry, chemistry and tourism.

The sectors prohibited or with few opportunities for foreign investment are: Several sectors are provincial or federal monopolies in Canada. Among them are health, alcohol imports, energy, roads and education systems. Foreign direct investment is limited in some sectors (broadcasting and telecommunications, uranium production in air transport services, banking).
